

3-67

Prairie Astronomy Club Lincoln Nebr
March 28th 1967.

Our next meeting is on March 28th. (Tuesday) night at the
Nebraska Wesleyan University, Science Building, 7.30 P M .

The Presidents Report.

We had an Un-scheduled star party at my place on march
10th. It was one of the best nights we have had for a long
time. Ten club members were out, and we had six scopes for--
the viewing session.

The first dollar for our observatory was turned over to
our Treasurer, and that leaves just \$2999.00 that we need-
to meet our goal.

I have been thinking about having our club take part in
some of the Centennial doings. If some one of you have any-
ideas about this, let me know.

See you the night of the 28th at Wesleyan.
Earl Meser Pres.,.

Program, or part of it.

Three aspects of observing, plus Eyepieces. Larry Stepp

Mirror Accuracy--- (Mirror) Steve Kunkie

A good spherical Mirror--- (Mirror) Ricky Johnson.

Monte Cole has arranged a Star Party at Gateway Shopping
Center For May 15th.

Three Comets mentioned in March Sky and Telescope Magazine.

As of today, there are several large spots on the Sun,
and a whole group of small one strung out in a line. I
took several pictures and if they turn out O.K. I, ll print
them and bring to the meeting. (Tues, 21st. 12 noon J.L.W.

Having been away for a spell, im short on material for this
news letter, but watch out next month. Thats it for now. J W
