THE PRAIRIE ASTRONOMER

The Presidents Report

I recently heard from Phil Kelton. He is at the Computer Science dept. at the Uni. of Texas and working on his Phd. He also will be taking 2 courses in astronomy there next summer. Phil has joined the Austin Astronomy Club and says that he enjoys being in Texas very much.

I also received a card from Lawrence Pilgram. He has joined the St. Joseph Astro. Club and he also publishes their newsletter. It's good to know that our former members are still active in Astronomy, and whether their intrest in Astro. remains a hobby or becomes a proffession I wish them the best of luck!

Again this year I will send all of you Seasons Greetings via the newsletter.

See you at the meeting
Earl Moser

Our meeting will be at the Olin Hall of Science at 7:30 on THURSDAY Dec. 27.

Thanks go to Mertin Sprengle for our new address labels.
